

WE reduce environmental pollution with our lightweight Composite products.

We demand a high degree of quality for our products and services to fulfill our tasks. It is the prerequisite for long-term cooperation with customers and positive business development.

We develop components and implement solutions in close collaboration with our customers. Our strengths are competence and on time project implementation, fulfilling the agreed criteria.

WE undertake to comply with all environmental laws, regulations and obligations, as well as to comply with all legal requirements regarding health, safety and other requirements relating to risks.

We offer a challenging, interesting and varied work environment. Through internal and external training, we promote our personal to gain professional skills achieving our goals.

We are working intensively with institutions and partners to develop and advance our dynamic products. We make the same demands on ourselves as on our partners.

We are environmentally conscious in the company and actively contribute to resource conservation and waste prevention.

We are constantly striving for improvements. Problems are seen as a challenge and using teamwork we can systematically eliminate the cause.

We focus our business on protecting and maintaining the health of our employees. We constantly improve our safety standards to ensure the health of our employees.

We are constantly developing our processes and implementing targeted improvements in order to optimize the quality and avoid environmental pollution.
